

THANH LIEM NGUYEN

Front-end Software Engineer | React · TypeScript · Developer Platforms

Da Nang, Vietnam | liem1762001@gmail.com | github.com/liemgumball

PROFESSIONAL SUMMARY

Front-end Software Engineer with 2 years of professional experience developing and maintaining shared engines and developer packages for an enterprise low-code platform. Experienced in React and TypeScript, model-driven UI architecture, developer API design, semantic versioning, dependency and release management, CI/CD, vulnerability scanning, technical documentation, and modernization of engineering tooling. Use Claude Code extensively in daily development for implementation, refactoring, debugging, testing, and documentation.

PROFESSIONAL EXPERIENCE

mgm technology partners | Front-end Software Engineer

2024 - Present · Da Nang, Vietnam · Open-source project: github.com/mgm-tp

- Develop and maintain reusable front-end engines and developer packages consumed by multiple application teams on a long-running enterprise low-code platform.
- Build model-driven runtime capabilities that transform JSON-based application models into configurable UI and behavior, enabling Business Analysts to create applications through modeling.
- Design and maintain developer-facing APIs for application customization, with attention to stable contracts, extensibility, backward compatibility, and clear usage documentation.
- Own shared libraries across their lifecycle, including dependency upgrades, package maintenance, semantic versioning, deprecation strategy, migration guidance, and breaking-change management.
- Keep the platform aligned with current ecosystem standards; contributed to modernization initiatives including monorepo management migration from Lerna to pnpm and end-to-end testing migration from Cypress to Playwright.
- Improve CI/CD and package quality practices, including dependency maintenance and vulnerability-scanning pipeline improvements for shared packages.
- Write and maintain API documentation, technical specifications, migration guides, and release notes for consuming teams; collaborate with Business Analysts, developers, architects, and platform teams on modeling and platform evolution.
- Use Claude Code as part of daily engineering work to accelerate implementation, refactoring, investigation, debugging, test creation, and technical documentation while reviewing and validating generated changes.

FREELANCE PROJECT

Football Field Booking & Administration Platform | Freelance Full-stack Developer

Designed and developed the customer booking application, administration dashboard, and backend API for a football field booking platform.

Responsible for booking flows, field and booking management, authentication, form validation, map integration, reporting dashboards, database modeling, API development, containerization, and CI/CD setup.

Technologies: React · TanStack Query · React Hook Form · TanStack Table · Recharts · Mapbox · Node.js · Express · MongoDB · Mongoose · OAuth 2.0 · Zod · Docker · GitHub Actions

TECHNICAL SKILLS

Front-end: React, TypeScript, JavaScript, HTML, CSS, Redux

Engineering: Developer Platforms, Model-driven Development, API Design, Shared Library Maintenance, Semantic Versioning, Backward Compatibility, Breaking Change Management

Tooling & Delivery: Node.js, pnpm, Playwright, Cypress, Gradle, Docker, Git, Jenkins, GitHub Actions, CI/CD, Vulnerability Scanning, Claude Code

Databases: PostgreSQL, MongoDB

EDUCATION

University of Science and Technology - The University of Danang

Engineer in Software Engineering | PFIEV - Programme de Formation d'Ingénieurs d'Excellence au Vietnam | 2019 - 2024

LANGUAGES & ADDITIONAL

Languages: Vietnamese, English, French | French: DELF B2
